To help preserve the irreplaceable green space of the golf course we have started a tree removal and replacement program. In 2020 we cut down and removed 32 dead trees around the golf course and replaced 12 of the trees with Sugar Maples.

We are currently seeking donations to help us with replacing more trees around the course. Our goal in 2021 & 2022 is to plant 10-12 trees each year.
